Orinda Summer Enrichment Program— Go Green!

Go Green!

Entering Grades K-5

Jim Bartleman, Director

Our Summer Enrichment Program features "Go Green," an exciting curriculum designed to allow your child to explore our fascinating natural world, using themes and materials from nature. We put the emphasis on FUN as we explore the Earth's diverse land forms, build solar, wind, and water powered machines, learn about animals, birds, fish and plants, and create and build with natural materials such as wood. We offer hands-on scientific investigations of many parts in our natural world. This informative and enriching program includes skill and appreciation development in the visual and performing arts, building, modeling, drawing, zoology, botany, geology, and so much more! Our program is taught by some of the finest teachers in our school district! Go Green!

Fantastic Fun Fridays!

Every Friday we have special all-school activities such as picnics, assemblies, and special guests. Each Friday reflects our Go Green theme!

Schedule and Courses

Kindergarten & First Grade (Entering Fall 2011)

A self-contained three hour class from 9a-12p which includes a variety of topics and activities.

It's A Big, Big World

Kindergarten Program

Welcome to our arts and kindergarten preparation curriculum, lovingly taught by kindergarten specialists, especially designed to ease incoming K-kids into school with a love of learning! The morning mimics a regular kindergarten school day. Our "Go Green!" theme takes a look at the Earth's living and growing things and features activities in art, music, drama, puppets, dance, language arts, emergent writing, crafts, P.E., science and math, etc, all woven together in a visual and performing arts style! Our big new school world welcomes you!

Mon.-Fri. 6/20-7/15* 9a-12p (4 weeks) 2151S

It's Only Natural!

First Grade Program

Features a fun, hands-on exploration of Earth and its natural forces! We study wind, water, and the sun and make fun machines that tap their power! We use a wide variety of materials from nature to grow plants from seeds, create art, and build crafts. Reading, writing, science and math are folded into program, and students take home many "Earth inspired" projects! Come join our investigation of the Earth as we discover GREEN POWER!

Mon.-Fri. 6/20-7/15* 9a-12p (4 weeks) 2152S

Schedule and Courses

Grades 2-3 & 4-5 (Entering Fall 2011)

Students attend two courses each day (9-10:20a and 10:40a-12p). Please make a first, second, and third selection for each "A" and "B" session. Every attempt is made to schedule students in their first choice classes. If a class is full, or there is not sufficient enrollment, an alternate choice is scheduled. This may affect the actual classes received. Classes and times are subject to change. Visit website for complete description of courses, www.cityoforinda.org. Go Green!

Kindergym

Parent (Adult)/Child Class (Child Ages 1-3)

Much of a child's early learning comes through physical activity. Our Kindergym program offers range-of-movement exploration activities where a child can climb, hang, jump, balance and bounce. In this healthy environment, the parent offers positive, encouraging, and helpful feedback. A skilled staff member is always on hand to assist. The equipment is rearranged each week to provide a new challenge.

Parents are required to have infants in packs. Siblings are only allowed in class if registered. Child must be walking. Use make-up book in the Kindergym for missed classes due to illness or cancellation of a class. Prior to participation, a Hold Harmless form and information sheet must be completed.

Algebra Summer Workshop

Albert Lee, Smartlounge Orinda

Algebra skills are a key part of math success, and too often, we see students who are mystified by the concepts and techniques. The workshop focuses on a wide range of skills, stretching from pre-algebra to calculus, but avoiding “compartmentalizing” techniques to one class, as you will find that many are used in a range of classes.

SAT I Prep

Albert Lee, Smartlounge Orinda

As a mandatory part of the college application process, the SAT I is a great chance for students to make a positive impression. Unfortunately, it also causes a large amount of stress for the students taking the test. While there are no secrets to getting a perfect score, we cover the format and key strategies in the test, and give students plenty of practice to put the strategies in action. We try to keep as simple as possible, but the tips and strategies have proven to be helpful for students of all levels. Our classes have been very successful, and best of all, are offered at a fraction of the costs of many other programs.

Orinda Youth Theater

Orinda Musical Theater & Orinda Little Theater

Co-Sponsored by Kids'N Dance

Children of all abilities are proud to be a part of our polished mini-productions of musicals that are fun, challenging, and engaging. Cast members learn to develop character, vocal technique, presentation, and dance skills. The Orinda Little Theater (4-8 year olds) sing, dance, and perform a short play. The 6-10 year old casts present plays lasting about forty minutes with about 4-6 songs and the cast for 8-14 year olds present plays lasting about 1-1/2 hours with 10-12 songs. Participants are expected to independently study their lines, songs, and blocking (as scheduled) and to attend all rehearsals. In addition, parents support the quality of our productions by committing a required six hours of time (for a \$60 fee you may opt out of doing the work and Kids'N Dance will hire someone to take your place). Most costumes are supplied, but parents are required to provide the basics. Please have child prepare a song for the first day of class (except for Orinda Little Theater). Children do not have to know how to read for the Orinda Little Theater shows. Please read refund policy carefully, but absolutely no refunds or credits are issued once this program begins. Additional charge for show tickets. Show times are subject to change.

AWESOME ENGINEERING

Engineering & Construction with Erector® Sets

Ages 5-12

AWESOME Engineering Staff

Are you ready to have an AWESOME time? Learn about engineering and construction concepts using Erector® educational toys. Build things you encounter everyday; including bridges, cars, skyscrapers and more! Some of the concepts covered include: Torque vs. Speed, Belt and Pulley Systems, Gravity, Friction, and Truss Systems. You are provided with everything you need to build each project which includes a tool belt, tools and project pieces. This hands-on class allows you to work together to solve problems while building projects. Returning students work on new projects.

MAD SCIENCE CLASSES

Mini-Engineers: How it Works!

Ages 3-5.5

Curious kids want to know How Things Work. We are going to uncover the science secrets behind the magic of magnets, create amazing color potions in our Color Lab, have a blast with the awesome power of air, and even travel to space to find out more about the planets and why the stars twinkle! Every day includes a take-home project based on what we learned so that you can show your friends How it Works!

MAD SCIENCE CAMPS

Future G (Geniuses)

Ages 3-5.5

Inspire young minds with this hands-on science program! Use the scientific method to uncover the mysteries of motion and energy. We experiment with everything from color to structures, and music to space! Each day includes a related take home project for the Young Geniuses. Come have fun in this interactive and engaging class.

Let's Get Growing!

Ages 3-5.5

Explore and learn how gardens grow, from the first seedling, to the important roles of sun and rain, to the amazing plants and flowers that sprout and bloom. Become acquainted with the insect inhabitants of gardens and how they help make gardens become so beautiful. Campers add daily to a mural reflecting what they have discovered. Spend a week learning all about how gardens grow.

My First Lab

Ages 3-5.5

Become a junior Mad Scientist! This camp is a great introduction to science. Preschoolers explore their sense of sight, sound, smell, taste and touch. Children use a magnifying glass to discover the world of creepy crawly creatures. Explore the science of the sea and the fascinating creatures that live there. Campers become paleontologist by searching for fossils and participating in a mini-dinosaur dig. Finally, take an exciting mission with Mad Science to explore the planets, moons and stars. Take-home projects included each day.

Crazy Chemistry

Ages 6-10

We explore and create exciting chemical reactions, make colorful concoctions and bubbling brews. Amaze yourself with magical temperature changing baggie science or disappearing ghost crystals. Study the chemistry involved in not-so-simple things like chalk and soap, and even experiment with the chemistry used by artists, spies and detectives! Chemists bring home a project each day.

Inventors!

Ages 6-11

Each day campers are given a series of challenges they must overcome using basic materials, simple machines, tips from world famous inventors and the most important thing of all—their minds. The camp involves a team-based approach to solving problems like, “If you were stranded on a desert island how would you survive?” Students must consider how to build shelter, find food and water, and protect themselves from the elements. Discover and Create!

PLAY-WELL TEKNOLOGIES

Teaching Engineering to Kids

Take a “crash course” in Demolition Derby, design a Mighty Metropolis, enter the Sumo Wrestling Competition, build and race a Locomotive faster than a speeding Worm Drive. Children are given instruction, design challenges, and competitions appropriate to their facility with LEGO® Technic and System components. This is an opportunity to build that great LEGO® project with guidance and assistance from our qualified staff. These are fun, challenging, hands-on, and minds-on camps suitable for LEGO® novices to “maniacs.” These camps are not affiliated with the LEGO Group.

Pre-Engineering with LEGO® Ages 5-7

Create, play, and learn. Build a town, city, or star base with houses, buildings, pyramids, bridges, tunnels, towers, and more. Build motorized cars, trains, buses, and trucks; race them; crash them; repair them. Explore the many possibilities of LEGO® building systems while learning useful construction techniques.
